

WHITEPAPER

VISION

We created HAKU-RYU TOKEN out of the vision to connect the anime world with the DeFi-space. Haku is the famous main character from one of the most popular anime movies – Spirited Away.

HAKU-RYU TOKEN (\$RYU) is a decentralized token, built on the Binance Smart Chain (BSC).

With its future DEX-Swap (HAKU SWAP), the RYU Staking system, an exclusive NFT collection for holders and a breakthrough Play-to-Earn-game, HAKU-RYU opens a ecosystem for the community to get financial freedom in anime related experience.

HAKU SWAP allows investors to get access to the DeFi-space.

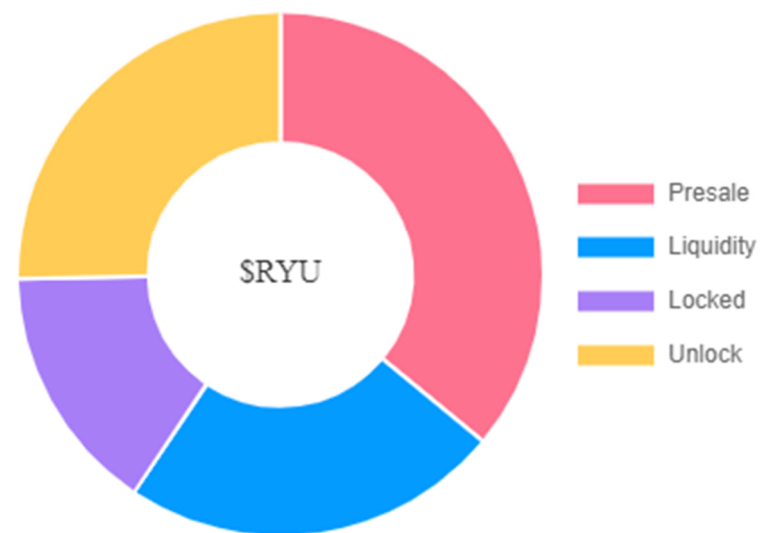

With the RYU STAKING investors have a chance to get rewarded for providing liquidity to the ecosystem.

In the upcoming Play-to-Earn-Game (Name not revealed) investors of HAKU-RYU can immerse themselves into a anime inspired world, where they can unlock powerful features and earn \$RYU. This connects every aspect to the ecosystem.
